

NEW FABRIC COVERS

Lyngdorf loudspeakers available with new fabric covers by Gabriel

The Lyngdorf loudspeakers MH-2, MH-3, FR-1 as well as the boundary woofers BW-2 and BW-3 are now available with higher-quality fabric covers in five new colors.

The fabrics are made by Gabriel from Denmark. Gabriel is one of the leading fabric specialists since 1851 and creates the finest fabrics for furniture and interiors. The fabric has been specifically created for acoustic use and still provides a dense, high-quality woven cover. It is OEKO-TEX® STANDARD 100 certified. The fabric is attached to a new, very rigid frame, which avoids resonance and retains its shape for years to come.

While the Lyngdorf speakers and woofers in black cabinets are supplied with a black fabric cover, and speakers and woofer in white cabinets with a grey fabric cover, all fabric covers are available as an accessory.

The covers are available in black, petrol blue, dusty green, grey, and red.
